

NW Fire Learning Network
Workshop 4: Successful Collaboratives

Agenda

Goals of workshop sessions:

1. To share how successful collaboratives work on federal landscapes.
2. To evaluate and discuss how effective are "Principles of Restoration" - have they advanced forest restoration in the SW, Colorado, etc. Could they be useful for landscapes in NW FLN and at what scale - landscape level, statewide level.
3. Sharing desired condition modeling exercises!

Tuesday, Nov. 13, 1pm - 5pm

1:00pm Welcome, Logistics and Introductions - Amy Waltz

1:15pm Welcoming Statements - John Allen, Deschutes Supervisor

1:30pm Northwest Fire Learning Network - past, present and future

2:00pm Successful Collaboratives:

OBJECTIVE: Provide examples of collaborative operating guidelines, and successful participation with federal partners and land management planning.

2:00 - 2:30pm Lake County Resource Initiatives - Jim Walls

2:30 - 3:00pm Friends of the Metolius - Gregory McClarren

3:00 - 3:30pm Small Diameter Collaborative Use "knitting circle" -
Jeff Allen

3:30 pm Break

3:45 pm Importance of collaborative desired conditions and a lead in to the effectiveness of collaborative principles - Rick Brown

4:15 pm Breakout -- Why we're successful.

OBJECTIVE: Participants will develop a list of successful strategies collaboratives have used to 1. develop key operating principles and 2. work on federal landscapes.

5:30 pm No host Social hour - at Cascade Brewery

Wednesday, Nov. 14, 8:30am - 5pm

7:30am - 8:30am Breakfast (provided)

8:30am Intro and day's outline (Amy Waltz)

OBJECTIVES: 1. Participants will review local principles/ guidelines to determine the effectiveness of restoration guidelines at local scale for principles of restoration. 2. Participants will develop barriers and strategies to developing restoration principles and applying principles to projects.

8:45am Restoration Principles - the why where and who - examples from our own landscapes.

10:15 Break

10:30 Breakouts -

1. The scale of restoration principles - to determine the appropriate scale for principles - broad, landscape level to project/site-specific.
2. Principles of restoration - to determine what principles of fire-adapted forest management we currently have consensus on.

12 PM - 5pm : Pick-up sack lunches (provided), load vehicles for field trip. Field trip to Glaze Meadow - applying principles to the ground, creating a list of opportunities (projects, landscape assessments) to work with principles. Objectives: Participants will evaluate the effectiveness of on-the-ground application of principles.

5pm: Dinner on your own

Thursday, Nov. 15

7:30am - 8:30am Breakfast (provided)

8:30 am - Day's outline

8:45 - 11:15 am Examples of spatially explicit desired conditions:

OBJECTIVE: Participants will assess the effectiveness of new techniques in collaborative planning.

8:45 - 9:30 am Applegate Valley - Mapping desired condition scenarios - Dave Hockman-Wert - USGS.

9:30 - 10:15 am Benefits of a Social Conservation Action Plan - Gary Gnauck

10:15 - 10:30 am Break

10:30 - 11:15 am Uses of Deschutes data in federal planning - the prioritization tool.

11:15 am Workshop After Action Review and Next Steps.

12:00 pm Adjourn - please turn in evaluation, get some power bars and sodas for the road and drive safely!!
